Feb 25, 2011

Mr. Jim Bise
Myers Container

Dear Mr. Bise:

This letter is to certify that **all** KNS drum linings are produced with materials listed in the Federal Register under 21 CFR 175.300 (Resinous and Polymeric Coatings for Direct Food Contact). When properly applied and cured all our linings are FDA approvable.

The USDA's basic focus is to regulate food additives. Drum linings are not considered food additives as long as they conform to the FDA approval process. The USDA does not issue direct approvals but acknowledges linings to be in USDA conformance when they comply with FDA requirements.

KNS linings also comply with the requirements for Islamic and Kosher packaging. All our products are comprised of synthetic resins and inorganic pigments. We do not use or handle animal products of any type in our products or manufacturing processes.

Very Truly Yours,

A handwritten signature in black ink that reads 'Edwin F. Poland'.
